

Finding Products that Have True Response to Intervention

Response to Intervention (RTI) is an approach used to identify and support students with behavioral/learning needs through universal screening. It is marked by high-quality instruction: individualized, intensive daily sessions, and progress monitoring/evaluation.

Common Misconceptions - It is...

Special education? While special education eligibility can be a product, RTI's goal is to deliver evidence-based interventions through student responses.

Only pre-referral? No, it is a comprehensive service delivery system that requires changes in how schools serve students.

On its way out? No, substantial research shows improvement for multiple grade levels; schools using RTI are meeting AYP targets and the student needs.

Characteristics of "True" RTI - It...

Effectively teaches all children

Advocates early intervention

Employs the multi-tiered service delivery model

Utilizes a problem-solving model to make decisions between tiers

Implements research-based interventions

Progress monitors students to inform instruction

Applies data to drive decisions

Breaks down curriculum intervention efforts into Tiered instructional groups

Are the Boot Camp products in alignment with true RTI?

Yes, the Bootcamp products stress research-based evaluation and instruction for all Tier groups. The use of games and hands-on fun are used to heighten motivation and student performance while lessening the preparation time for teachers. This approach coupled with quality teacher training, impacts the success rate of RTI.
